

ADVANTAGE Mounted Points

ADVANTAGE Mounted Points are a mixture of white aluminum oxide and blue ceramic sintered aluminum oxide in a vitrified bond. The soft bond combined with the easy to break down, sharp-edged grain, allows for extremely high stock removal with excellent life.

These new points are suited for surface work on titanium materials, nickel and cobalt based alloys, steel components and build-up weld deposits.

PRODUCT FEATURES

White aluminum oxide and blue ceramic sintered aluminum oxide mix
Extremely high stock removal
Excellent life

FOR USE ON

Titanium, nickel and cobalt based alloys, steel
